MEASURING INSTRUCTIONS FOR "DE NIRO" HIGH-LEG RIDING BOOTS

Please take care when measuring, and to help us provide you with boots which fit perfectly, we would ask you to read the following instructions carefully before completing the form. Measurements, in centimetres, must be taken whilst wearing jodhpurs or breeches and socks, no shoes, and must be taken whilst seated. You may find it easier if someone else does the measuring.

- A. Back height, from the crease at the back of the knee straight down to the ground. Enter the actual measurement and then add 1,5-2 centimetre to allow for the shaft to drop in usage. (Altezza)
- B. Circumference of the leg just under the knee. (Imboccatura)
- C. Circumference of the leg at the widest part of the calf. (Polpaccio)
- D. Circumference of the leg at 15 cms up from the ground. (Sopracaviglia)
- E. Circumference at the position marked. (Passata)
- F. Circumference at the position marked. (Collo)
- H. Measure at the position marked, length of the foot. (Lunghezza piede)
- G. Circumference at the position marked. (Pianta)
